

Virtual Machine Setup

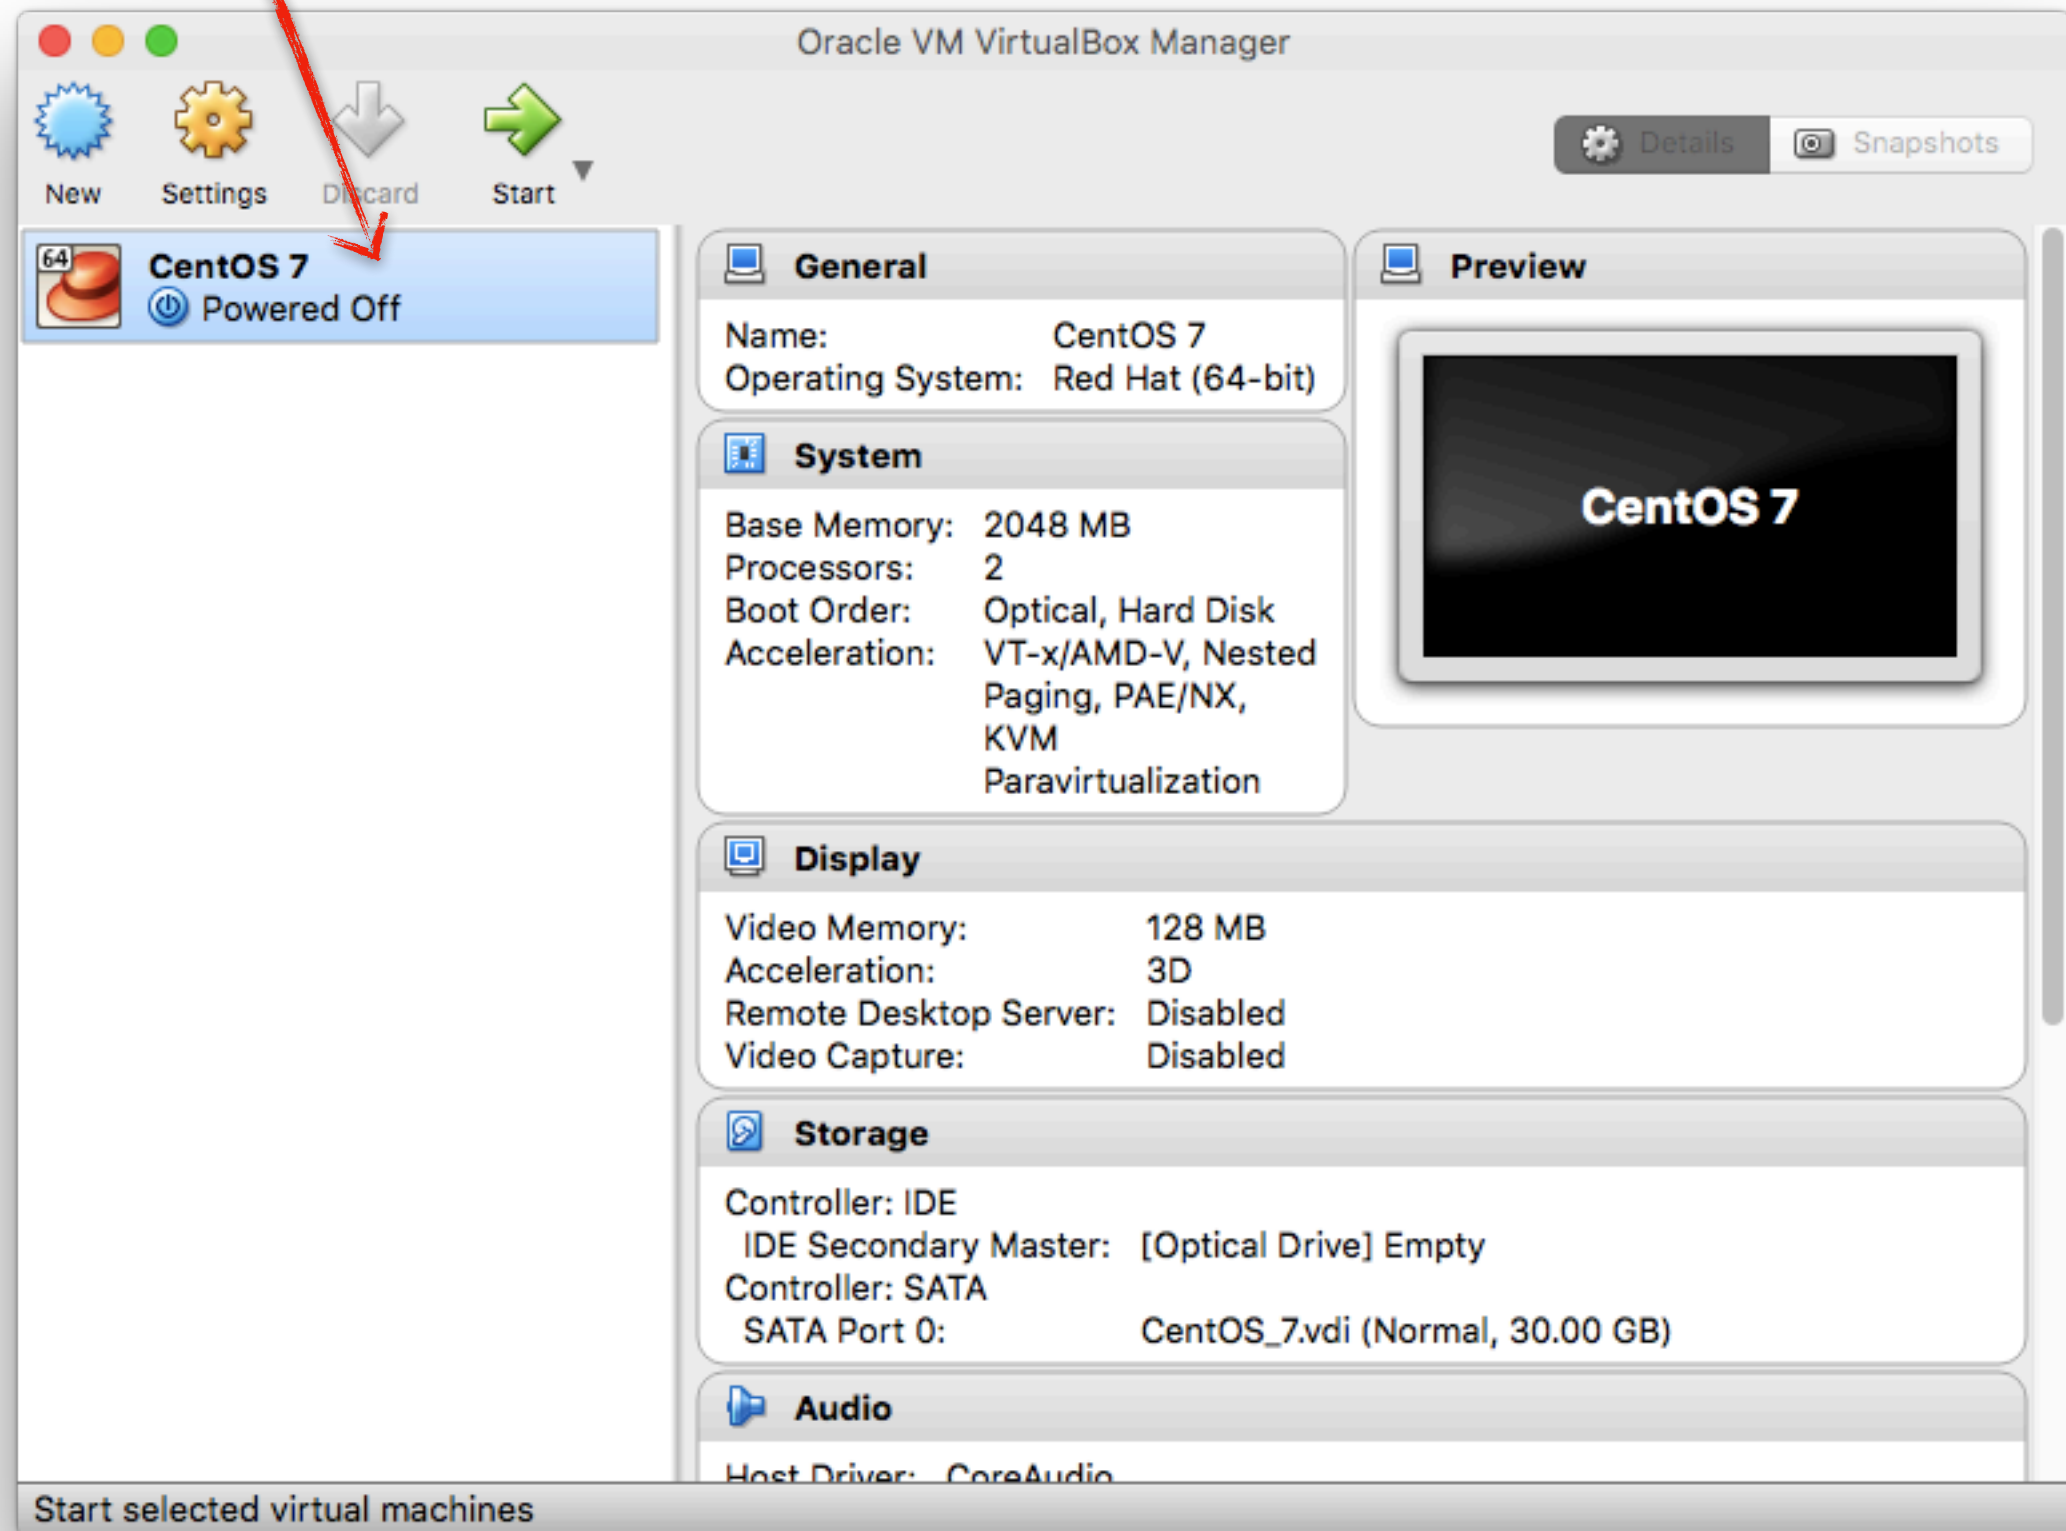

- Run directly from USB stick or copy to local disk (faster).
- Need 20-30 GB when running from local disk.
- (Double-)Click .vbox file to load. (Next time you do this, it'll start the machine.)

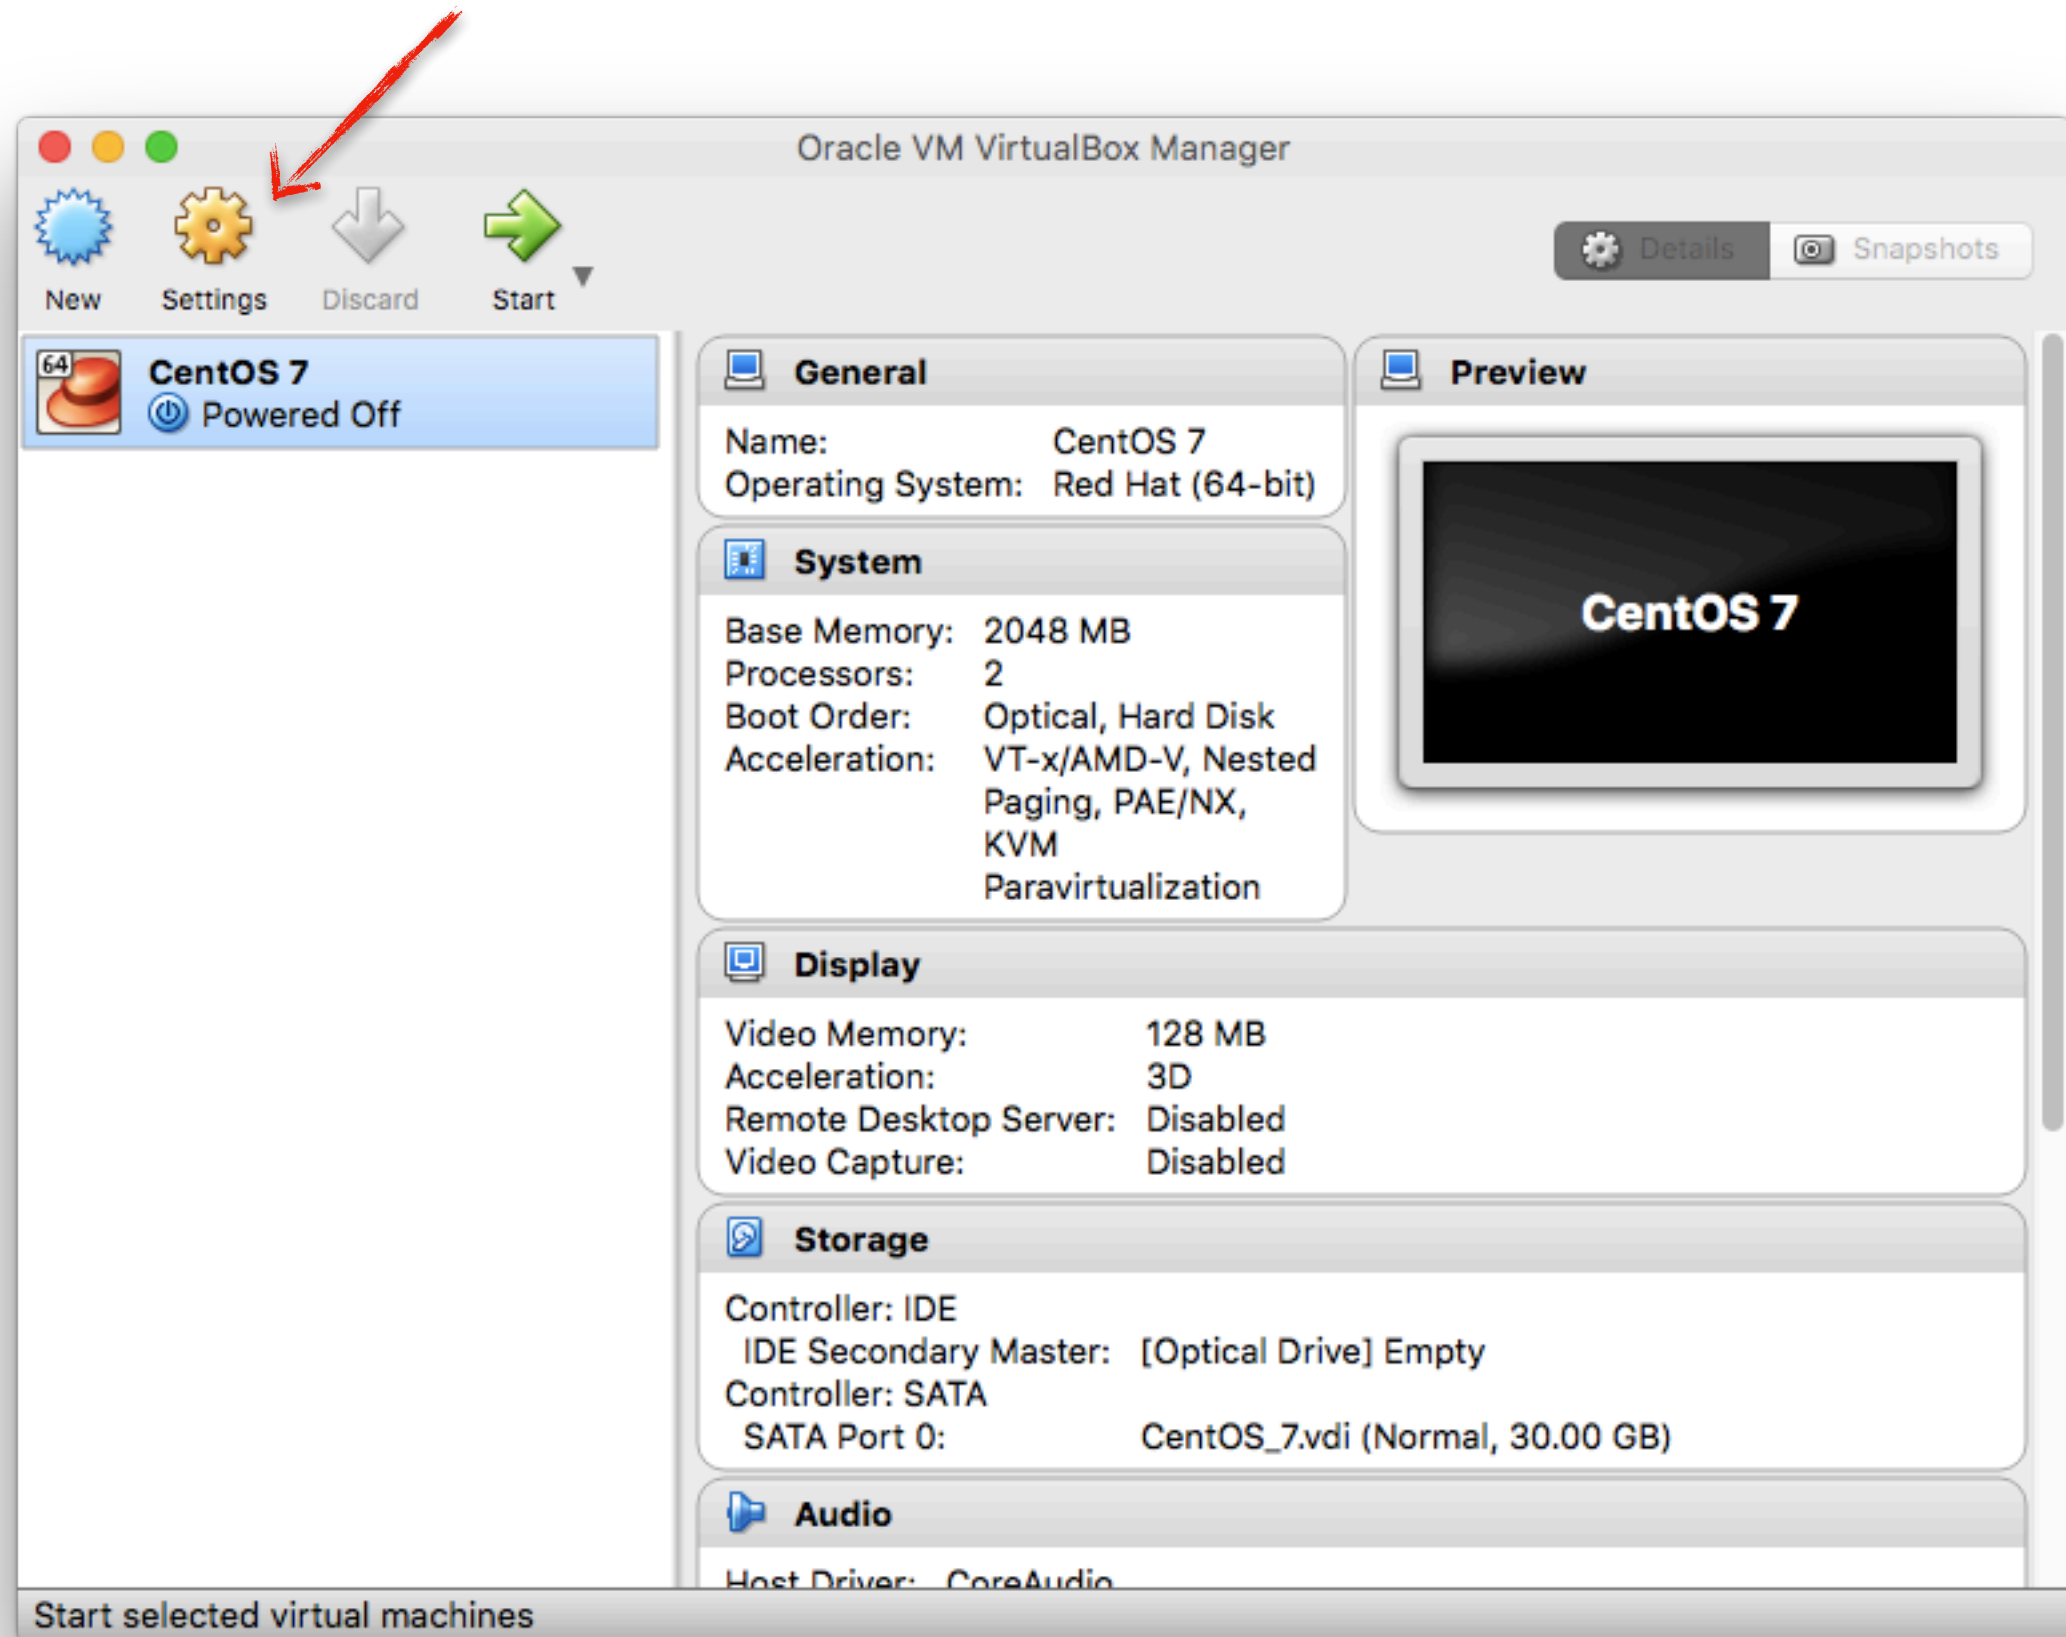

VirtualBox starts up

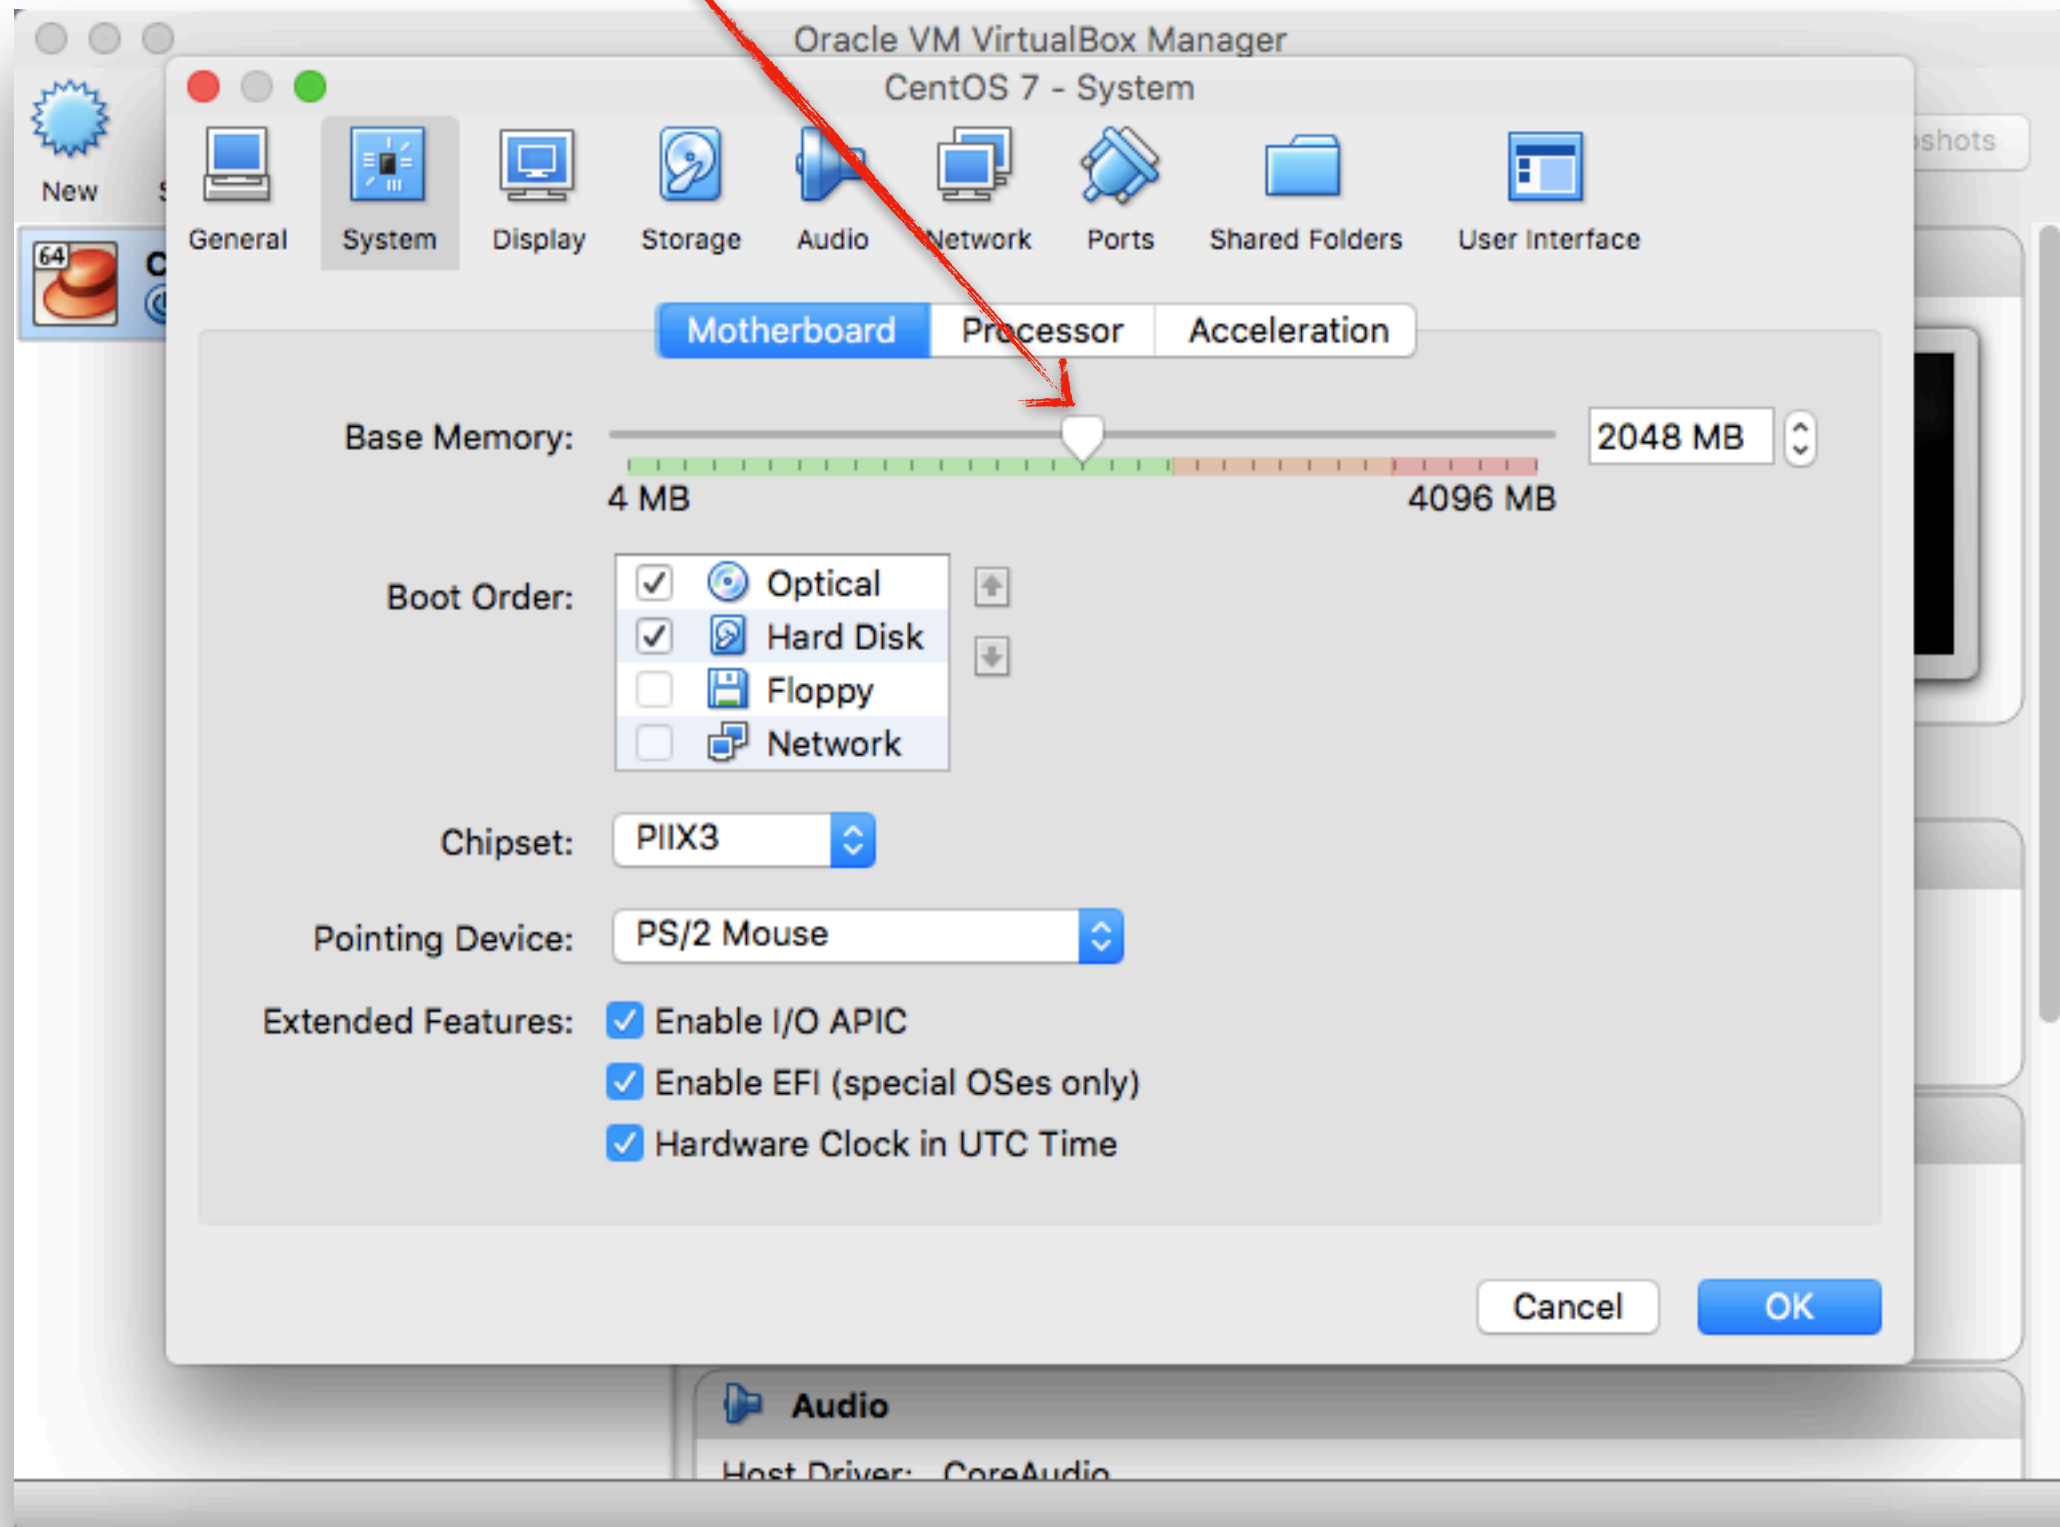

Select the CentOS 7 machine

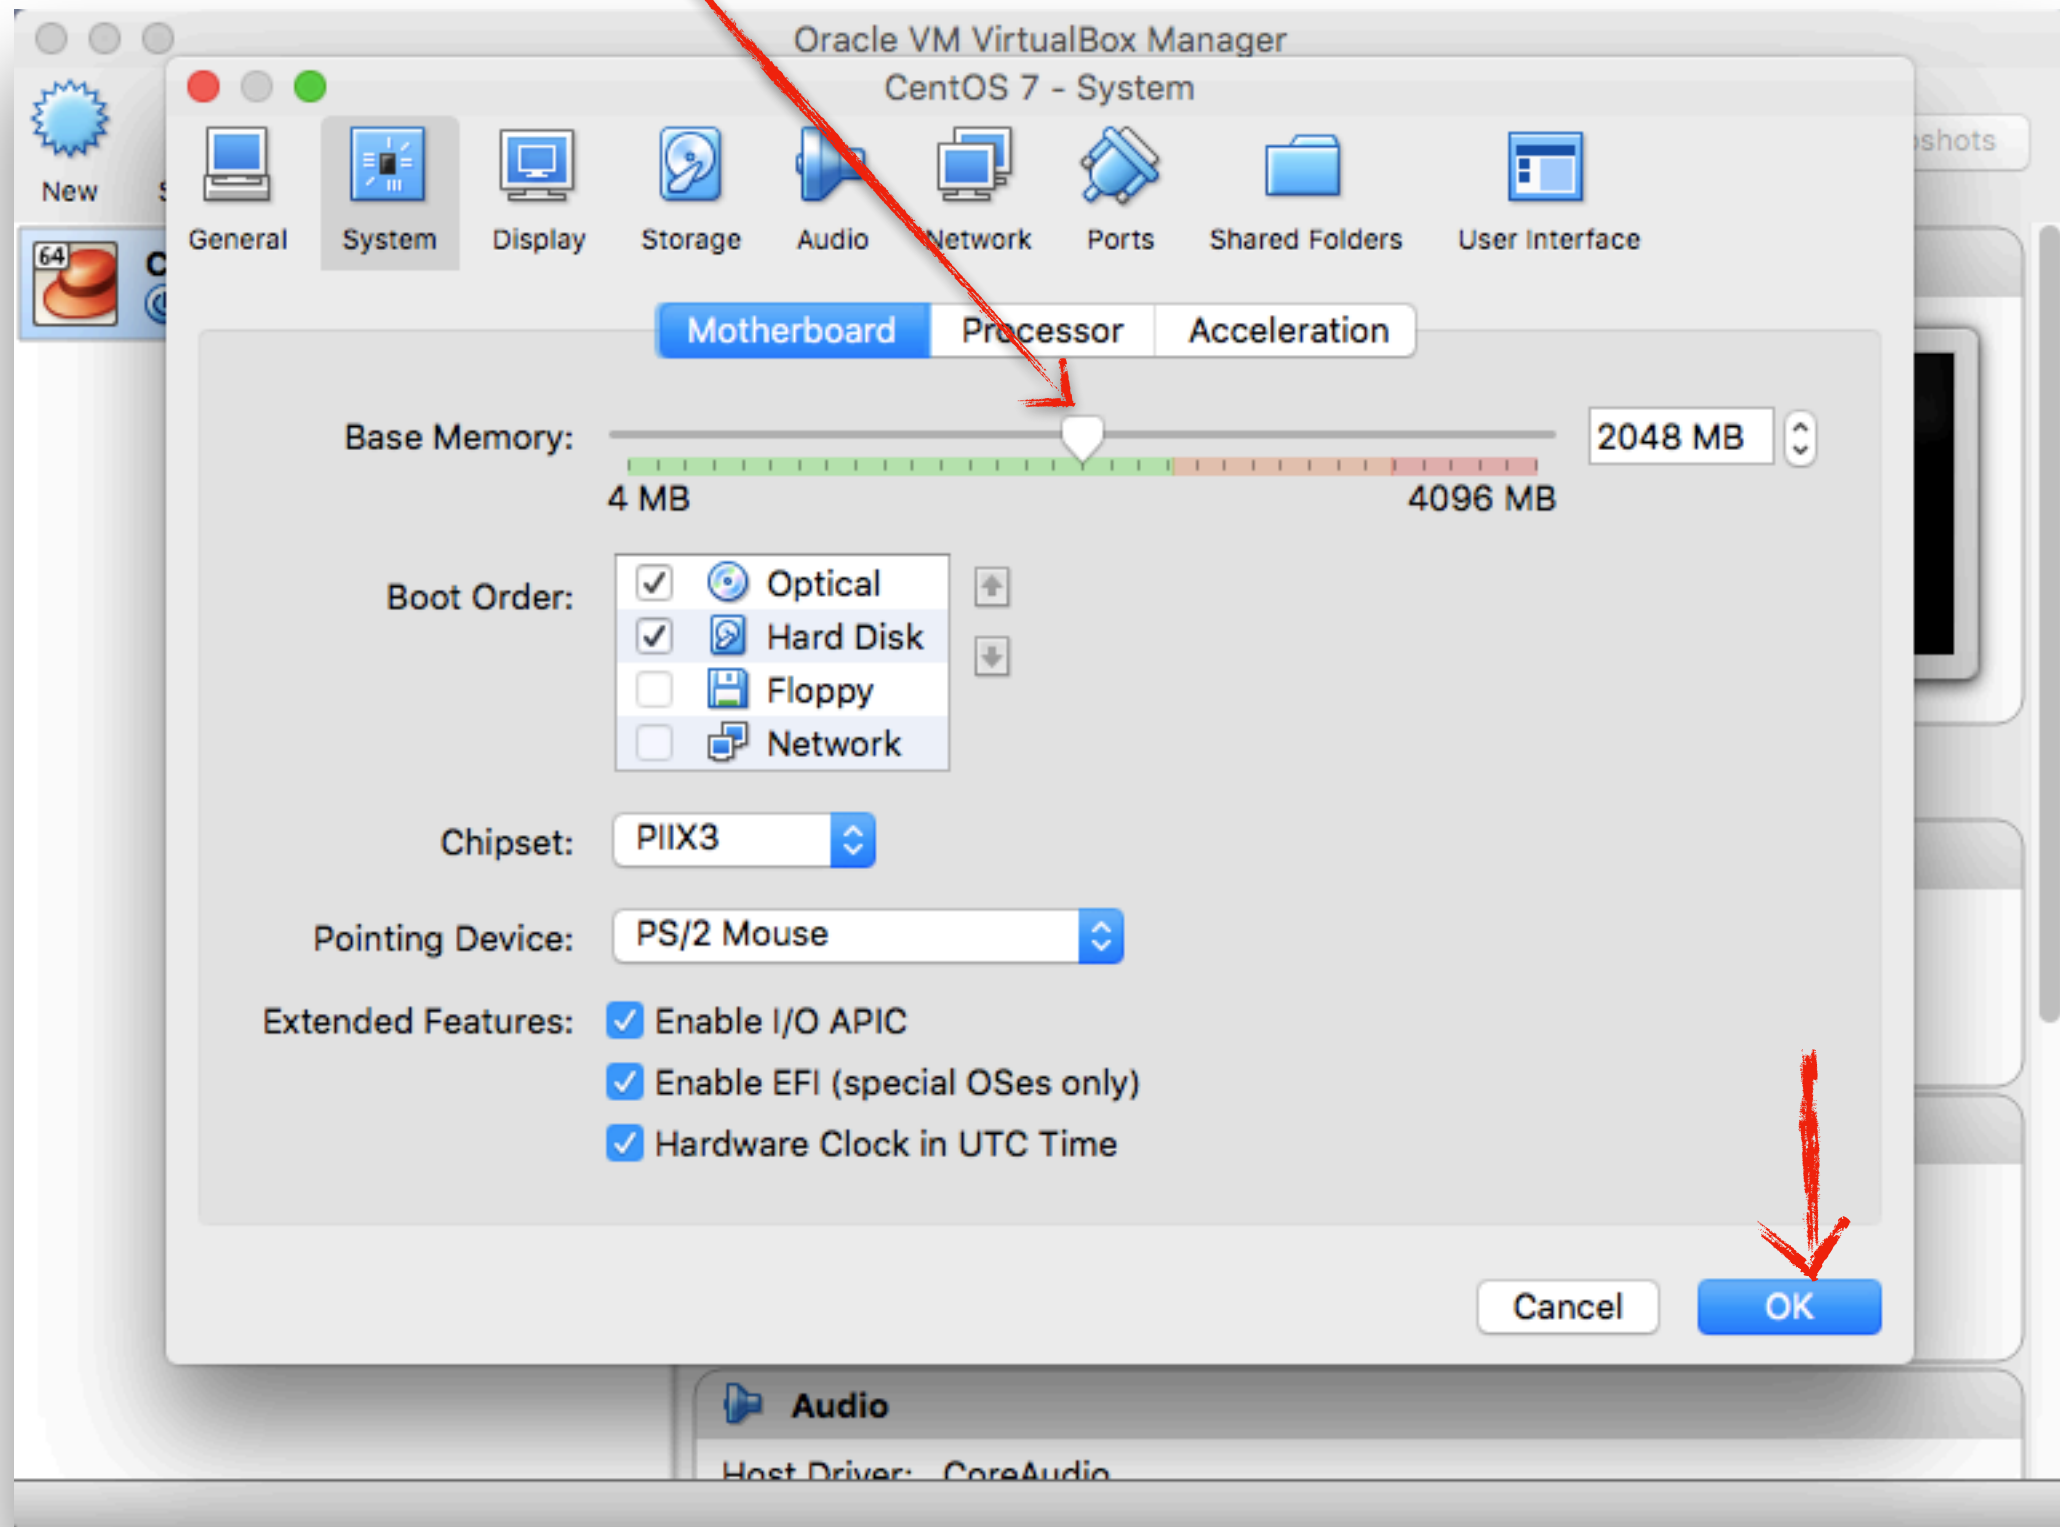

If you have more than 4 GB of RAM, click Settings

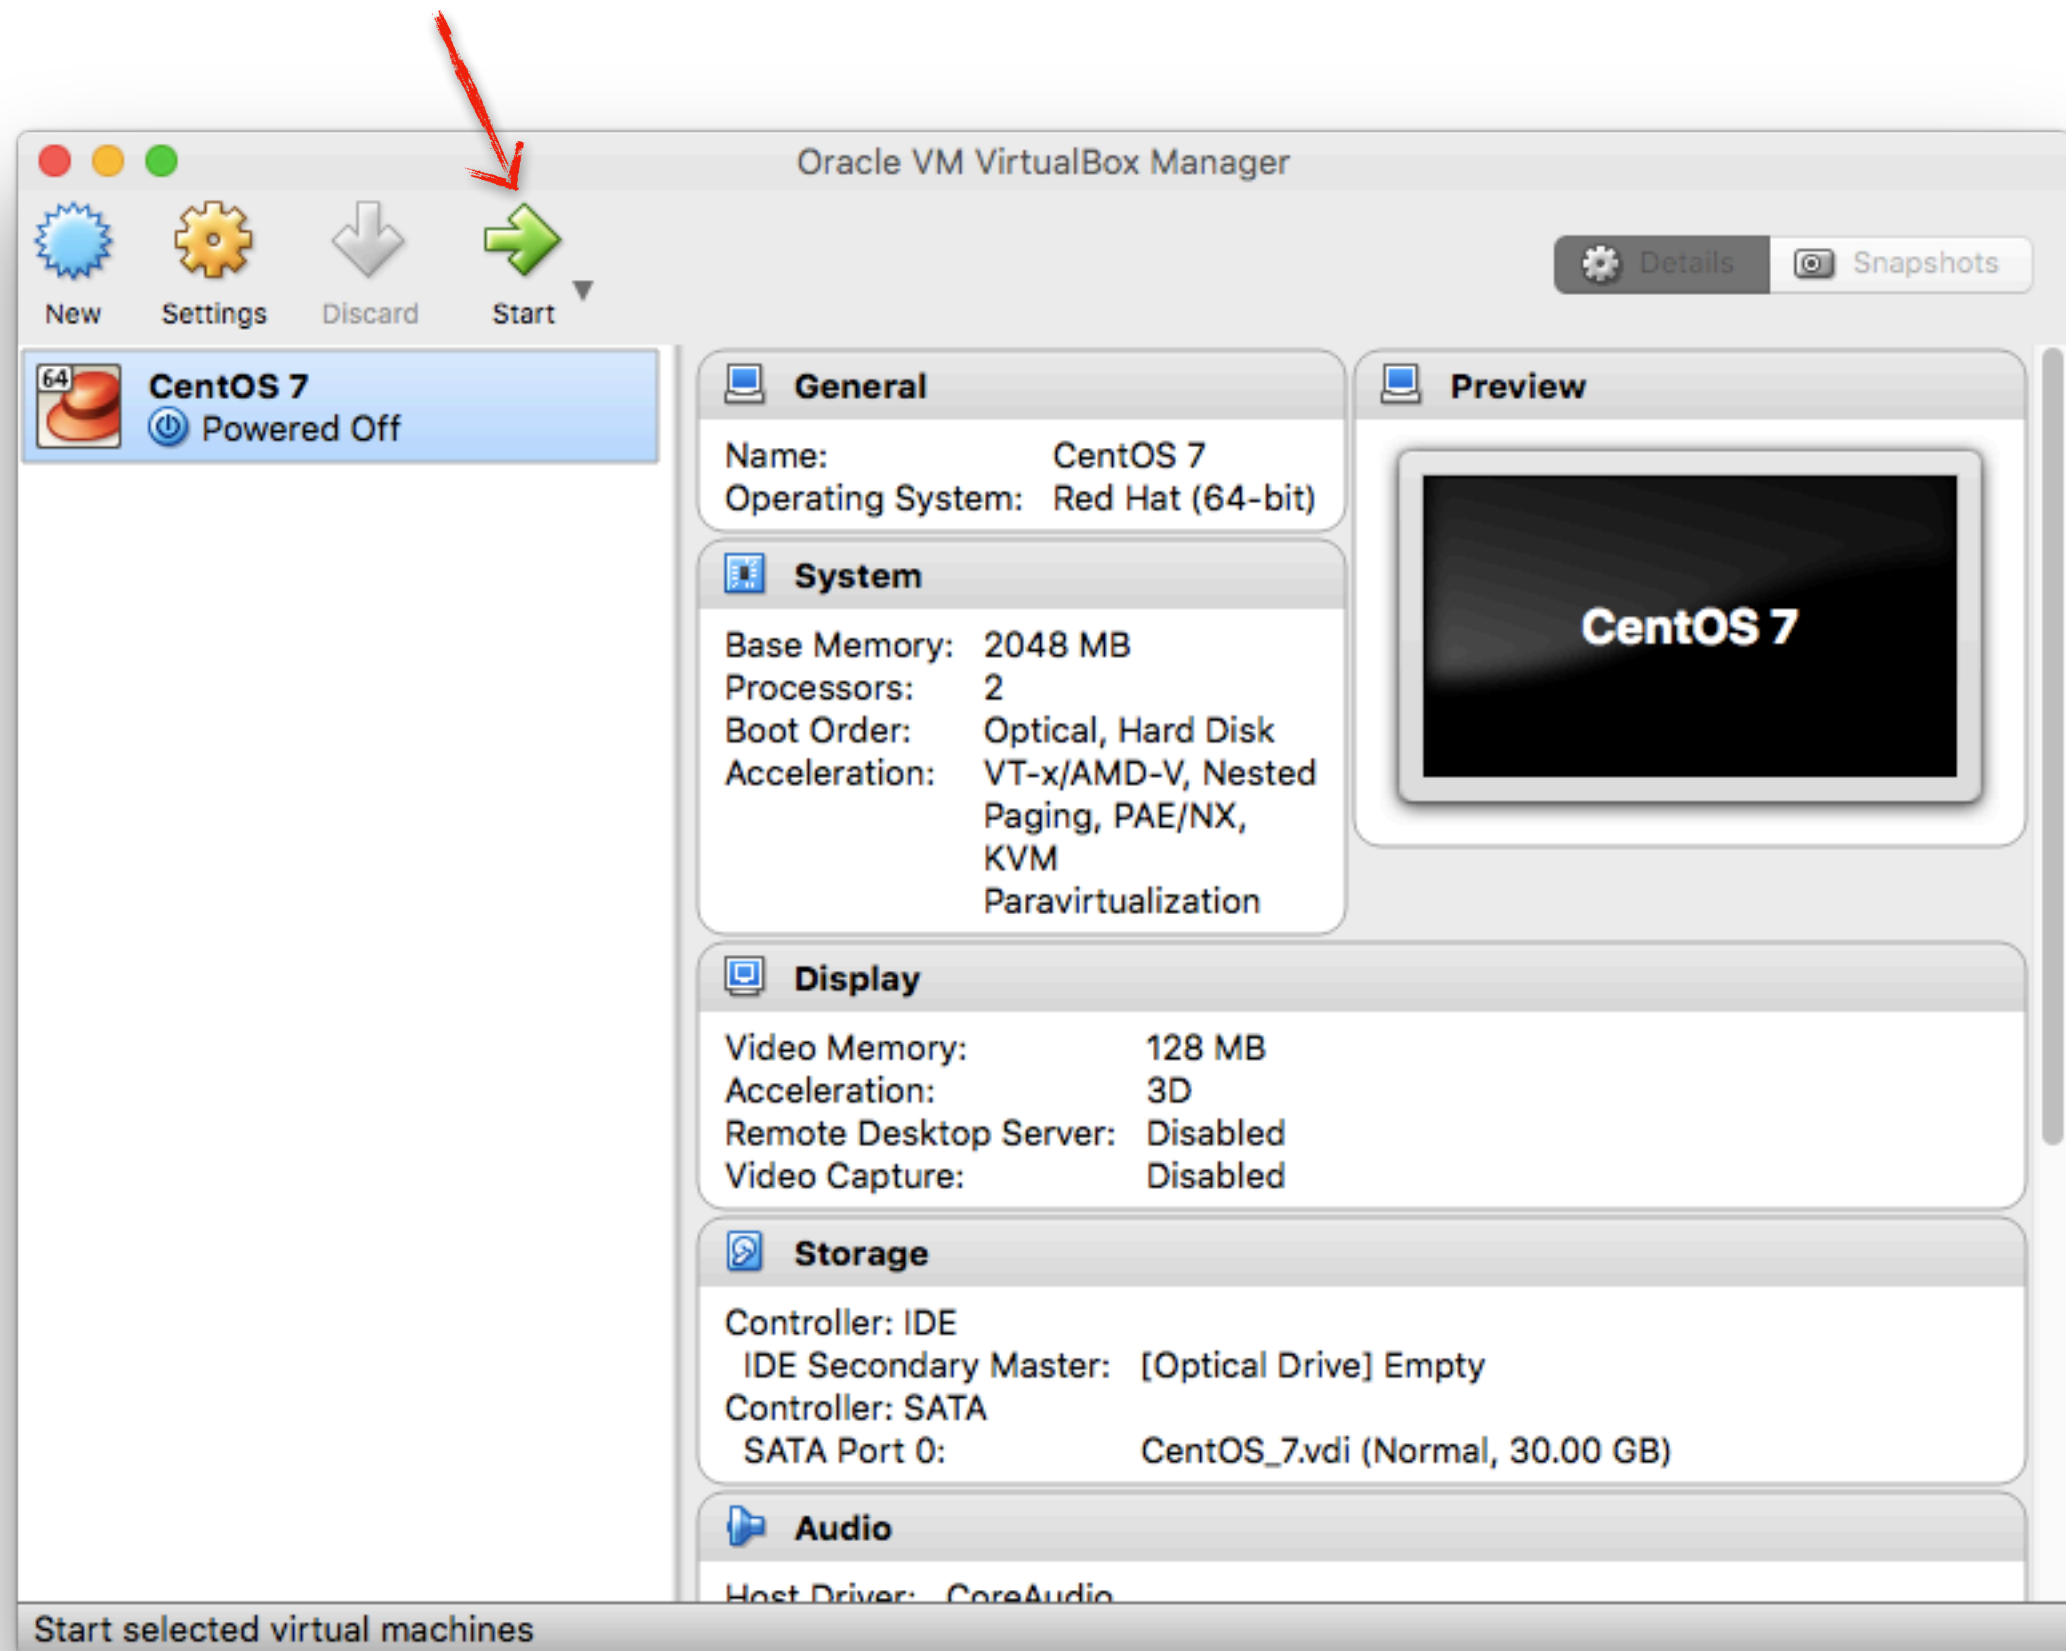

Adjust guest memory with slider. More than 4 GB are not needed.

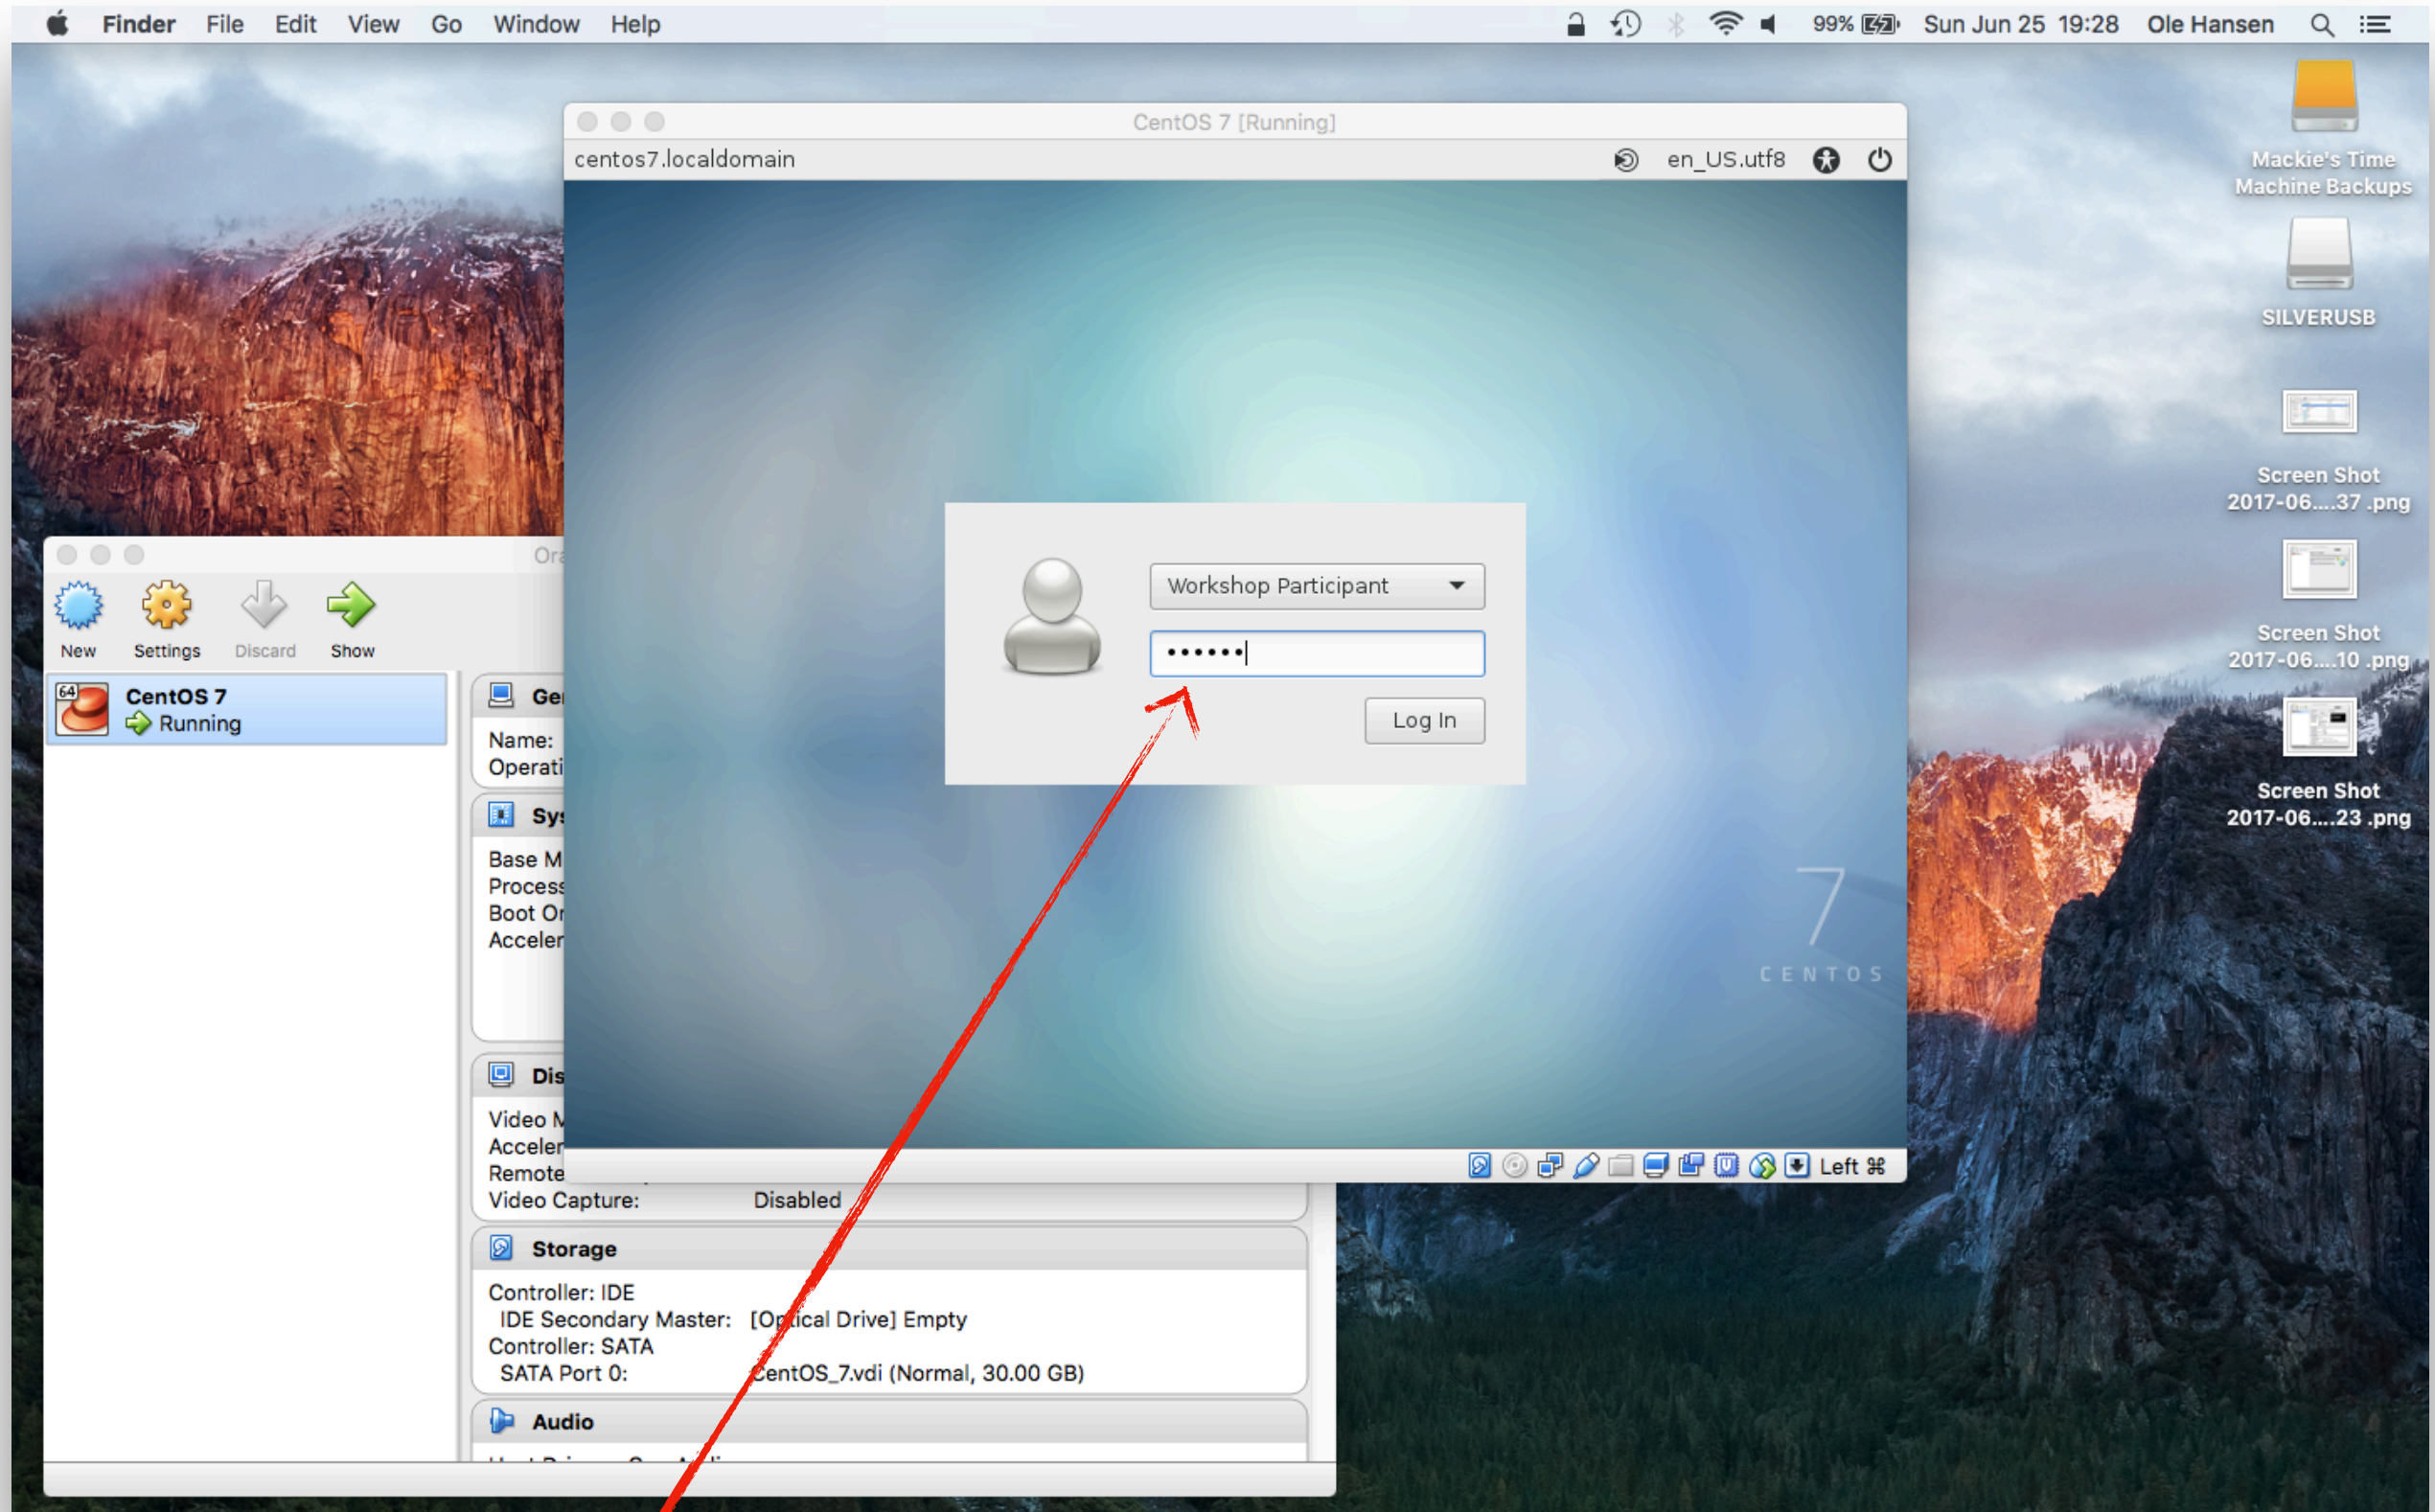

Adjust guest memory with slider. More than 4 GB are not needed.

Next click Start

Once booted, you should see the login window

The password is "hallac"
