

Hodoscope Calibration after hcana Update

Ali Usman

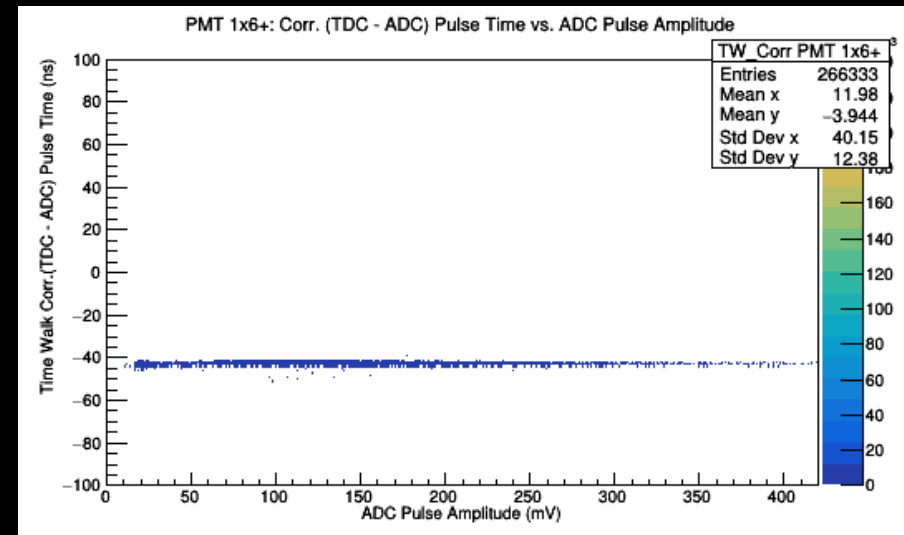

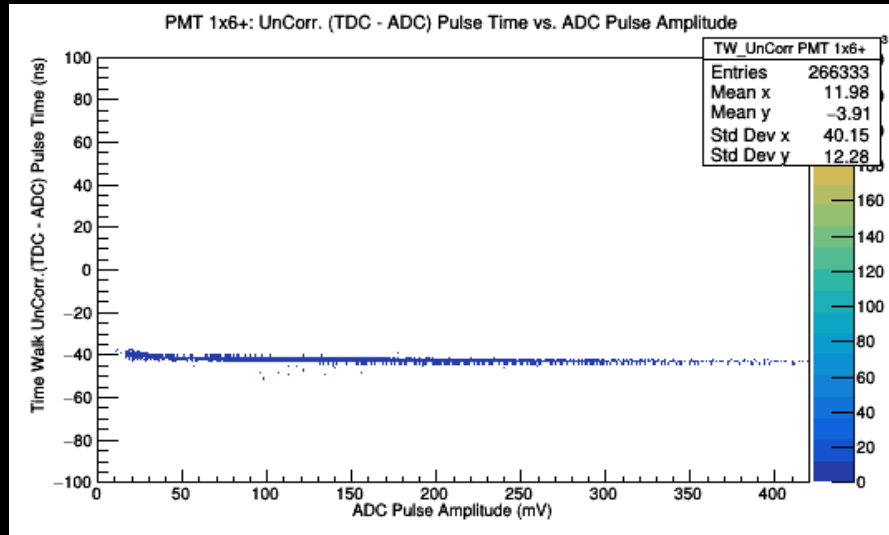

Introduction

- Looked at Hodoscope calibrations after Mark's new hcana update.
- Showing results for HMS with following run numbers.

Run #	E	P	Angle
5199	10.6	3.26	23.00
5303	10.6	4.20	19.91
6640	3.8	2.02	38.67
8030	8.2	2.32	27.77
8630	3.6	1.35	15.83

Summary & Outlook

- As expected, the calibrations are fairly stable throughout all the run periods.
- Briefly looked at SHMS and it has similar results for all the run periods.
- Will get back to the tracking analysis.
