

Update on Kaon LT Anaysis

Ali Usman
May 3, 2022

- Beam Energies – 6.2, 8.2, 10.6 GeV
 - Fixed spectrometer angles and momenta
 - All HeeP Singles
 - All Physics settings (Yet to be pushed)
- Key Issues
 - 6.2 GeV HeeP singles were missing from hclog
 - 10.6 GeV Physics and HeeP were mixed
- Currently testing Richard's Analysis script for Heep
 - Will need SIMC/Data comparison script from Richard

Accessing Spectrometer Angles from CODA

- Brad has a script that can be used to extract spectrometer angles snaps from the Coda files
 - Check this wiki

https://hallcweb.jlab.org/wiki/index.php/Extract_Angle_Cam_Image_from_CODA_files
(Few bounties offered by Brad at the end of this page)

- Added 6.2 GeV HeeP Singles to Kaon-LT Logbook
 - Check this link
