

# Before We Get Started

Please update the "Workshop2018" subdirectory in your virtual machine

```
$ cd ~/Workshop2018  
[ Workshop2018 ]$ git pull
```

Also, install a few packages that didn't make it into the initial setup, and download ROOT files for the final exercises

```
$ sudo yum install root-gui-fitpanel root-tree-viewer  
$ sudo yum install mysql-connector-python  
$ sudo pip3 install mysql-connector  
$ cd /data/ROOTfiles  
$ curl -O http://hallaweb.jlab.org/data_reduc/AnaWork2018/  
ROOTfiles/g2p_3132.root  
$ curl -O http://hallaweb.jlab.org/data_reduc/AnaWork2018/  
ROOTfiles/g2p_3132_vdc_u1.root
```
