

# KaonLTMeeting

February 29th, 2024

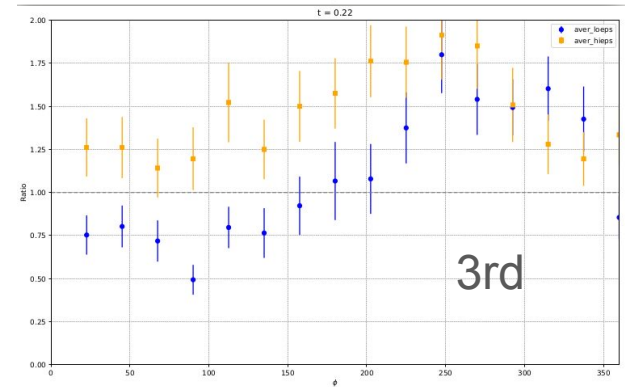

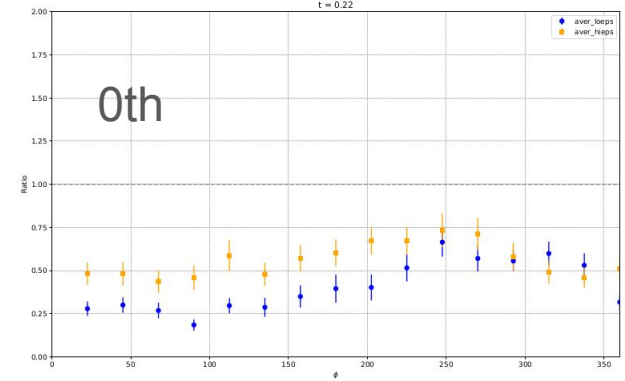

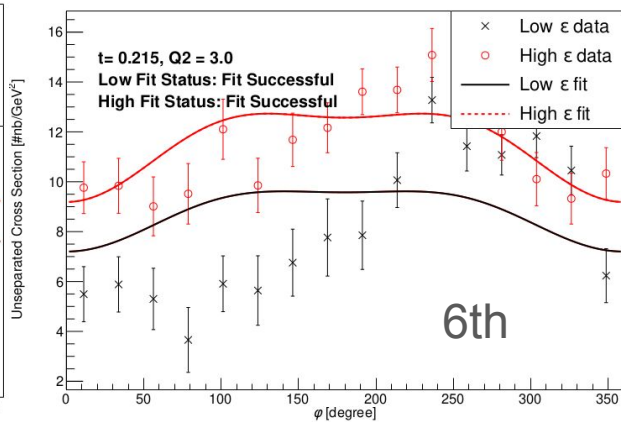

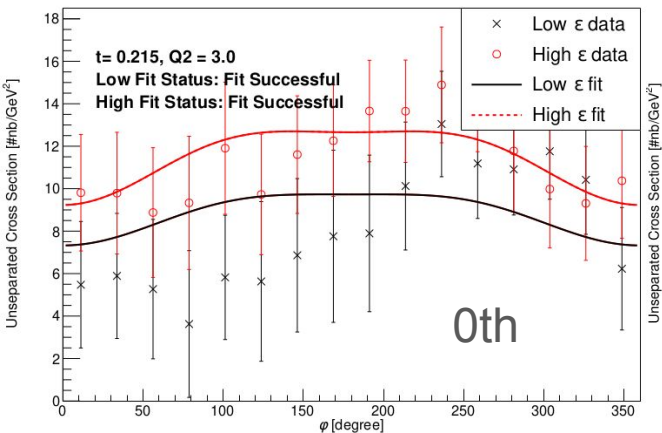

Richard Trotta

# Overview

1. **Iteration Script Issues**
2. **Unseparated Cross Sections**
3. **sigL/T vs t**

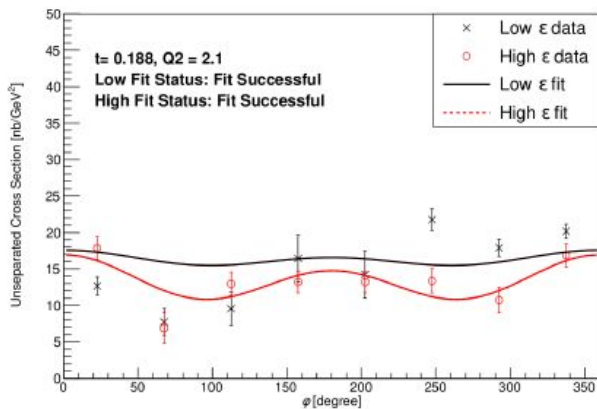

# 1) Iteration Script Issues

- Uncertainties for unseparated cross section behave very weird when iterating
- Ratios behave normally
- But statistical errors on unsep xsects get smaller???

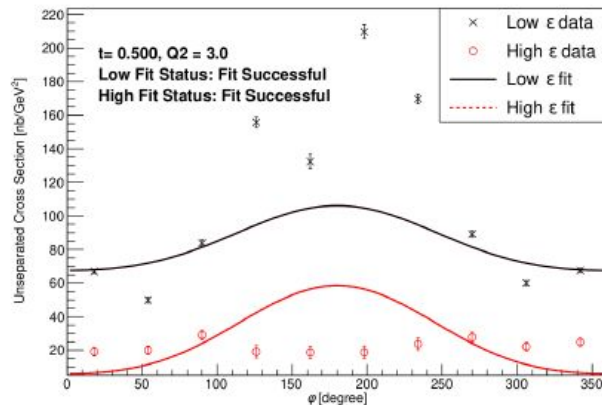

## 2) Unseparated Cross Sections

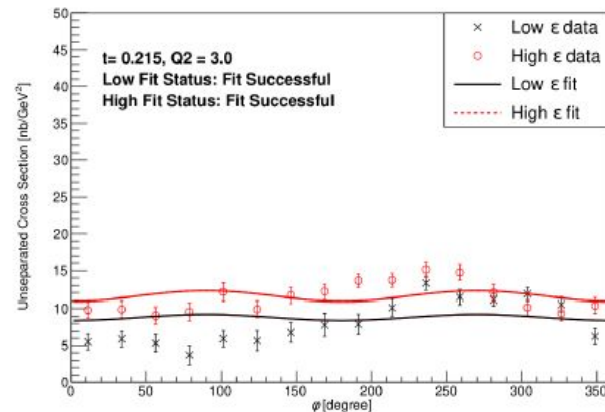

Q=2.1, W=2.95

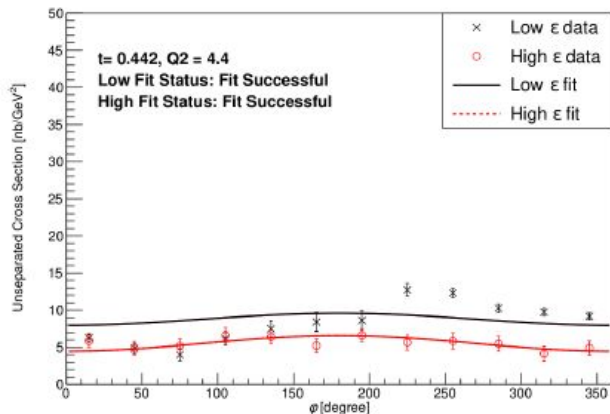

Q=3.0, W=2.32

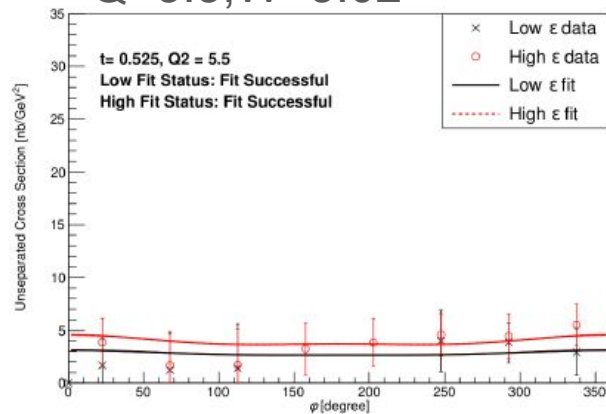

Q=3.0, W=3.14

Q=4.4, W=2.74

Q=5.5, W=3.02

### 3) sigL/T vs t
