
How to Access CODA Remotely

1. Open the hallgw computer:

```
ssh -L5904:localhost:[5digitnumber] [username]@hallgw.jlab.org
```

2. Log into compton@camsonne2-lpt:

```
ssh -L[same5digitnumber]:localhost:5902 compton@camsonne2-lpt
```

3. Open the VNC Viewer.

4. Open a new terminal window by typing the following command in the existing terminal

```
xterm &
```

5. You can create a new coda configuration or edit an existing one by typing

```
jcedit
```

6. The CODA GUI can be accessed by typing

```
rcgui
```
