<b>Responsible:</b>			

#### Description

It should be possible to supplement the internal detector name->type map from the command line on the fly, for example:

```
dbconvert --map K.s1=Scintillator,K.ag=Cherenkov DB_in/ DB_out/
```

The types are internally predefined in DefineTypes(). There should be a way to list the predefined names, perhaps something like --list-detypes.

#### History

#1 - 05/19/2017 05:01 PM - Ole Hansen

- Start date deleted (05/18/2017)

#2 - 11/28/2017 12:26 PM - Ole Hansen

- Target version changed from 1.6 to 1.7
